## Agenda of our meeting

- Reviewing of the questionnaire

## Discussion

In this meeting we reviewed all the questions in our survey form and changed/replaced the questions accordingly. Questions were based on the requirements from users' perspective. We had to design the questions in such a way that were easily understood by all the users.

## Conclusion

So, after reviewing all the questions we concluded that-

- All the questions should have their objective.
- To do so we had to think about the expected response from the users of all questions.

## Next meeting
