Termination Analysis for Project BeyondBooks

The Hackstreet Boys
Team-01

"BeyondBooks"

- Project Approval Date - 16 August, 2015

- Proposed Project Termination Date - 17 November, 2015

- Instructor - Prof. Asim Banerjee

Studies for Requirements gathering

- Brainstorming for taking up an idea and contributing to the idea already taken up.
- Conducting efficient surveys to capture all aspects of user functional requirements.
- Conducting faculty interviews.

Functionalities achieved

- Buying/selling books.
- Review and rating system for books.
- Starting and contributing to a discussion on an open forum.
- Personalised Bookshelf for each user.

Technical Functionalities

- The application does not store any data on the operating device. All the data is stored on the server.
- The application can be opened via a web portal or an Android smartphone.
- The application provides the book information via a search by ISBN of the book.
- A book can be searched by its author name, publisher or ISBN.
- A discussion can be searched by a question or a hashtag.

Unanticipated Problems

- The only problems faced were during integration and testing.
- The lack of communication during the vacations caused us to lag behind the schedule and the work had to be done faster from that point onwards.

Project was Terminated because

- All the proposed functionalities were met.
- Bugs were removed.
- The application has been tested.
